I had a call with the attorneys from Dow this morning. After I relayed the fact that EPA still intended on doing RI/FS caliber sampling, but could do a removal for the South portion of the Site in order to do an earlier ROD and get that portion delisted and ready for reuse, the PRP group removed its proposal. They are not interested in doing any kind of removal work even if it gets the South portion ready for reuse in 9 months if it means that they cannot get out of doing a RI/FS and the sampling requirements.
